

The New **MASS LOADED** "ML" Ligature

PATENT PENDING

ML-G (METAL)

ML-H (FABRIC)

PATENT PENDING

From Smooth Kenny G & Kim Waters to hot Springsteen's sax man Clarence Clemons, Paquito D'Rivera & Chris Vidala. The list goes on. Major mouthpiece manufacturers worldwide include Rovner ligatures with their high end mouthpieces!

Rovner Products are sold and enjoyed worldwide. "Baltimore magazine" January, 2004

Rovner Products has been innovating new products since 1974. Over 34 years of high quality, well designed, and thoroughly tested products. And once again, we present you with our newest creation-

METAL

"G" SERIES

FABRIC

"H" SERIES

Over 30 months in development, the new MASS-LOADED ligature utilizes weighted elements, along with a very sophisticated method of cushioning the interface with the reed, to yield a ligature of extraordinary performance.

No other ligature has a big, warm, and responsive tone with such a phenomenal degree of control. Played softly or mezzo-forte, this ligature yields a tremendous evenness of scale in the most effortless manner. Capable of converting a thin, bodiless sound into something with substance and warmth, this ligature will amaze with it's performance. It will bolster and solidify the lower register of both clarinets and saxophones; and enhance facility and response on the very bottom notes of saxophones.

**No time to practice?
 Chops a little weak?**

Not to worry- the "hold" this ligature gives will enable you to perform with impeccable intonation. We guarantee it!

Try it for 15 days- if you're not happy with it, receive a full refund plus \$5.00 towards your return postage. (must be fully insured if returned)

Metal \$89.95 Introductory offer- \$74.95

Fabric \$59.95 Introductory offer- \$49.95
